Summary

I help founders ship **AI-native MVPs**, and rescue stalled **React Native** builds - solo, or as a **fractional CTO**. Previously **Head of Engineering at Pointz**, the safer-bike-mapping platform. Most recent engagement: founding engineer of a **stealth AI app** shipped the MVP solo with Claude Code, exited Apr 2026. Comfortable as the sole technical owner of a product end-to-end: backend, frontend, databases, security, AWS.

Experience

• Stealth AI Startup

Remote (USA)

Founding Engineer

Dec 2025 - April 2026

- Shipped the **MVP** of an **AI-native product** that ingests user data (Gmail, Outlook, Google Sheets, and similar sources), processes it through an **LLM API**, and delivers actionable alerts via SMS/email.
- Direct LLM API integration prompt design, response handling, and retries. No RAG/vector store; intentional scope for the MVP.
- Exited in April 2026 after MVP delivery; available again for sprint and retainer work.

• Pointz Mobility

Remote (USA)

Engineering Consultant ad-hoc maintenance (Dec 2025 – Present)

Aug 2022 - Present

- Stayed the trusted owner of the codebase security, infra, payments, and mobile without the daily-driver load.

Head of Engineering (Sep 2024 – Dec 2025)

- **Sole technical owner** of the platform, handling backend, frontend, databases, security, and infrastructure.
- Built a robust, secure system with modern standards: **auth/session tokens, PKCE, SSL pinning, nonce validation, and encryption**.
- **Reduced AWS infrastructure costs by 65%** through EC2/RDS optimization and effective resource management.
- Improved backend performance, reducing API response times and making turn-by-turn more reliable.
- **Side project** prototyped an internal MVP with **Madina** (Python library for pedestrian/bicycle network analysis, MIT City Form Lab) to surface route-pattern insights for the product team.

Full-Stack Developer (Sep 2023 – Sep 2024)

- Took over the backend in **Java Spring Boot** within one week
- Architected payments **In-App Purchases** via **RevenueCat** and **Stripe for web** to migrate profit-share onto IAP.
- Developed new features under the **Pointz Plus** subscription model.
- Designed and implemented crowdsourcing features for hazards, shortcuts, and amenities.

Frontend Developer (Pointz: Safer bike mapping) (Aug 2022 – Sep 2023)

- Re-architected the navigation system to make **TTS** and **re-routing** better.
- Added integrations like Firebase, code-push, FB SDK, etc...
- Upgraded the app to the latest versions so that it supports new devices effectively.

• Eglaf Technology

Sr React Native Developer

Remote (India)

- Took over the Project to integrate the API and design state management
- Integrated **stormglass.io** API to get weather data.

Jun 2022 - Oct 2022

• Artistry Solutions

React Native Developer

Surat, India

Sep 2020 - Aug 2022

- MoodMe: Relationship Mood App
 - Integrated In-app notifications with Firebase messaging and linked to the relevant pages.
 - Fixed bugs and made the app stable across the maximum devices.
 - The app has reached more than **100k downloads** across iOS and Android.
- Trace Bust
 - Redesigned UI and implemented light/dark theme switching.
 - Upgraded the app to the latest versions so the app supports new devices effectively
 - Implemented In-App Purchase with react-native-iap.
- Prank Caller - Phone Dial App
 - Created a Unique Drawer animation with **60 fps** smoothness.
 - Implemented Prank Chat messaging.

Education

- Gujarat Technological University
 - Bachelor of Engineering - Computer Engineering
 - Conferred Feb 2023 (Coursework completed Jul 2022)

Technical Skills

- AI Tooling
 - **Claude Code**, Cursor, Claude Code workflow creation with skills and subagents
- Frontend:
 - React Native, React, Next.js, Redux, TypeScript, JavaScript, Android Studio, Xcode, RESTful APIs
- Backend & Data:
 - Node.js, Python, Spring Boot, Firebase, PostgreSQL, MongoDB, SQL, Turbo
- Security:
 - Auth/Session Tokens, PKCE, SSL Pinning, Encryption, Nonce Validation
- Cloud & DevOps:
 - AWS (EC2, RDS, S3), CI/CD, Docker, Google Cloud
- Integrations:
 - Payment Gateways (Stripe, RevenueCat, Razorpay, Braintree, In-App Purchases), Location Services (Google Maps, Mapbox, GPS, OSM), Comms Twilio (SMS, voice), Mailgun, Gmail API, Outlook / Microsoft Graph
